

XBee® & XBee-PRO® ZB Adapters

ZigBee® Device Adapters for Drop-in Networking

Easy-to-use adapters bring wireless connectivity to electronic devices in legacy wired applications.

Overview

XBee & XBee-PRO ZB adapters deliver wireless connectivity to electronic devices through advanced mesh networks. These adapters utilize the ZigBee PRO Feature Set, for robust self-healing, self-configuring networks. They are ideal for wirelessly enabling sensors, controllers and other devices in legacy wired applications, or where a common hardware interface is preferable.

XBee & XBee-PRO ZB adapters can be battery or mains powered. They are available in a wide range of physical interfaces, including RS-232, RS-485, USB (power harvesting), digital I/O and analog I/O. Built upon either low-power and low-cost XBee modules or extended-range XBee-PRO modules, these adapters can be purchased in a broad range of configurations and customized to meet your application needs.

Part of Digi's Drop-in Networking solutions, XBee adapters are compatible with ConnectPort® X gateways, XBee modules and XBee accessories. This family of hardware, software and management tools provides users with unparalleled flexibility and end-to-end communication between devices.
